Professional Summary

Full Stack Developer with 1+ year of experience building and deploying production-grade web applications using React, Node.js, TypeScript, PostgreSQL, and Docker. Skilled in REST API design, JWT/OAuth authentication, containerized deployments, and workflows. Currently pursuing a B.Sc. in Computer Science with a 3.99 CGPA. Passionate about building scalable systems and delivering clean, maintainable code.

Skills

Languages: JavaScript, TypeScript, C/C++

Frameworks: ReactJS, NextJS, NodeJS, ExpressJS, Tailwind CSS

Tools & DevOps: Git, GitHub, Docker, GitHub Actions, Redis, Nginx

Databases: PostgreSQL, MongoDB

ORM: Prisma, Mongoose

Design: Figma, Photoshop, Illustrator

Work Experience

Freelance, Remote | Feb 2025 – Present | Full Stack Developer

- Developed and deployed full-stack web applications across e-commerce, analytics, and SaaS domains using MongoDB, Express.js, React.js, and Node.js. Built scalable backend services and RESTful APIs with secure JWT and OAuth authentication, optimizing database queries and API response times to reduce latency by up to 45%.
- Designed custom dashboards and real-time data visualization tools with Next.js and TailwindCSS. Managed containerized deployments using Docker and configured Nginx for production, ensuring high availability and 99.9% uptime.

Intelligent Image Management, Inc. (IIMI) | Feb 2024 – Feb 2025 | Supervisor

- Managed a team of 20+ members, overseeing task allocation, workflow coordination, and timely project delivery while maintaining quality standards.
- Supported project planning, coordinated team efforts, and contributed to process improvements to streamline operations and enhance output efficiency.

Education

University of Information Technology & Sciences

Bachelor of Science in Computer Science and Engineering (CGPA OF 3.99)

2025-Running

Dhaka, Bangladesh

Project Work

- **TrackTruck:** Developed a full-stack system designed to help truck owners and drivers manage trips, costs, and payments efficiently. This version includes a secure login system, dashboard UI, trip management interface, and mobile responsiveness.
- **GameWeb:** Developed a modern, bento-grid styled web platform that showcases games built using C++ (Raylib) compiled into WebAssembly (WASM), allowing them to run smoothly in the browser. The site is also designed to host future games built with Java or powered by AI.
- **UniLibraryMangement:** Developed a full-stack University Library Management System using the PERN stack (PostgreSQL, Express.js, React.js, Node.js), featuring user authentication, real-time book availability, borrowing and return tracking, and an admin dashboard for managing inventory, users, and overdue penalties. Ensured efficient data handling and optimized SQL queries for scalable performance.
